

HiperBioPol project

Circular polycondensates with improved performance

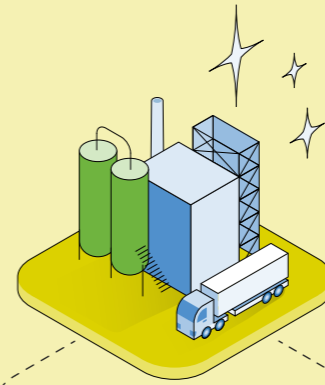

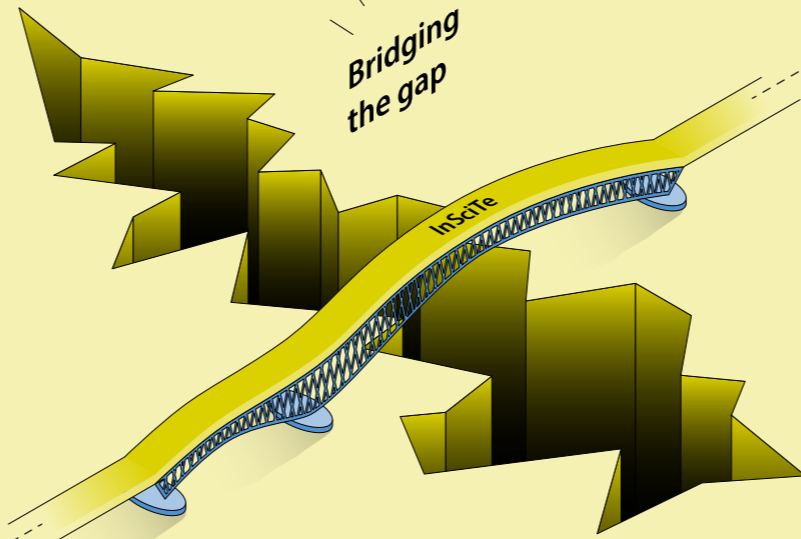

Bringing together collaboration partners

A great opportunity to make chemical processes more sustainable

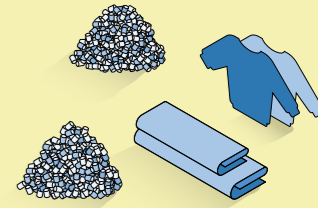

Bridging the gap

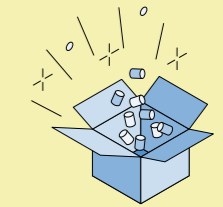

Scaling up technology
Breakthrough technology in a dedicated polyester/polyamide pilot plant

Biobased business creation by InSciTe
Public and private companies linking up, investing and sharing knowledge

Result 1:
30kg granulate samples for use in e.g. polyamide and polyester fabrics for cloths and coatings (many applications)

Result 2:
New knowledge: spin-out opportunities for better engineering materials
